Funding for Local Infrastructure Projects in California

Presented by Jeff Cooper

In this lecture, Jeff Cooper will speak on funding local infrastructure projects in California in the USA. Due to taxing limitations, communities often need to get creative in funding projects. The presentation discusses the challenges, the options and the ways to be successful in funding projects. In addition, 3 specific projects will be presented: Undergrounding Overhead Utility Districts; Street Light Improvement Districts; Sewer fees for improvements and maintenance.

Jeff Cooper is a Director of Municipal Services with NV5 which is a provider of engineering and consulting services to public and private sector clients. It delivers solutions through five business verticals: Construction Quality Assurance, Infrastructure, Energy, Program Management, and Environmental. With offices nationwide and abroad, NV5 helps clients plan, design, build, test, certify, and operate projects that improve the communities where they live and work

Jeff is also an ASCE Region 9 Governor based in San Diego. Region 9 is the only ASCE geographic region that encompasses only one state, California, due to its size and the number of members (18,000+). It has 4 sections, 17 Branches, 2 Life Member Groups, 12 Younger member Forums and 25 student Chapters.

Date

Thursday 15 November 2018

Time

5.00 pm for 5.30 pm

Location

Cardno Conference Room
Level 9, 203 Pacific Highway
St Leonards NSW 2065
